RUBBER RESEARCH INSTITUTE OF MALAYSIA

LOCATION. The Institute's offices and laboratories are at the third mile, Jalan Ampang, Kuala Lumpur and are open from 8 a.m. to 12.45 p.m. and from 2 to 4 p.m. through Mondays to Fridays and from 8 a.m. to 12.45 p.m. on Saturdays (except public holidays).

EXPERIMENT STATION AND FACTORY. The RRIM Experiment Station and Factory are situated at Sungei Buloh, 16 miles from Kuala Lumpur, on the Kepong–Kuala Selangor road. Visits to the Station may be made by prior arrangement. There is a guest house.

CORRESPONDENCE. All correspondence should be addressed to *The Director, Rubber Research Institute of Malaysia, P.O. Box 150, Kuala Lumpur, Malaysia.* However, special enquiries may be marked for the attention of Divisions and individual officers. The telegraphic address of RRIM is *'SEARCHING, KUALA LUMPUR'* and the telephone number is *KL* 467033 (10 lines). Senders' addresses should be written legibly on the outside of all packages; advice of their despatch by letter or telegram is requested.

PROHIBITED PLANT SPECIMENS. Plant Importation Rules prohibit the import into Malaysia of any part of a plant (living or otherwise), unless accompanied by a permit issued by the Director of Agriculture. Permits are not issued in respect of any diseased plant or plant pest and all materials imported in contravention of the Rules are destroyed without examination. Hence, any person outside Malaysia who desires RRIM's advice on any matter which may require examination of specimens should first ascertain whether such material could be imported.

ADVICE. Rubber producers in Malaysia, may seek RRIM's advice in regard to their special problems. Visits may be made by the Institute's research and advisory staff to estates and holdings in Malaysia as convenient and by special arrangement only. The only visits for which charges are normally made are those of our clone identification inspectors. Prior arrangements should be made regarding interviews.

PUBLICATIONS. Subscriptions to any or all of RRIM publications (including the *Journal, Planters' Bulletin* and *Reports*) may be entered by placing an order for the publication(s) together with the full remittance *in advance* for the exact amount payable for the items required, including postage. The subscriber will then receive the publications as and when they are published. No discount is given for any purchases. Lists of RRIM publications are available on request.

PLANTERS' BULLETIN

OF THE RUBBER RESEARCH INSTITUTE OF MALAYSIA

Kuala Lumpur 1976 Main Contents

Planters' Bulletin 142

	Page
Editorial: Soil Erosion	1
Soil Conservation with NR Formulations	3
Influence of Fertilisers and Covers on Fertility of Soils under Hevea	8
Alternative Latex Vulcanisation System for the Production of SP Rubbers	14
Notes, News and Views	21

Planters' Bulletin 143

Editorial: The Need for Proper Nursery Practices and Planting Techniques	23
Nursery Practices and Planting Techniques	25
RRIM 700 Series Clones Trials (Fourth Selection) First Report	50
Notes, News and Views	54

Planters' Bulletin 144

Editorial: Natural Rubber Custom Processed For Special End-Uses	55
Deproteinised Natural Rubber (DPNR) A Superior Engineering Rubber	57
Performance of Clones in Commercial Practice: Tenth Report	60
Research on the South American Leaf Blight at the Unit of the RRIM in Trinidad	69
RRIM 700 Series Clones Trials (Fourth Selection): Second Report	73
Notes, News and Views	81

Planters' Bulletin 145

	Page
Editorial: Effective and Efficient Control of *Imperata Cylindrica* (lalang)	83
Chemical Control of *Imperata Cylindrica* (L) *Beauv.* (Lalang) in Malaysia	85
RRIM 700 Series Clones Trials (Second and Third Selections): Ninth Report	90
General Principles of Experimentation	102
Notes, News and Views	106

Planters' Bulletin 146

Editorial: Coagulation of NR Latex	107
Trends in Preservation and Coagulation of NR Field Latex	109
Continuous Coagulation of Latex	112
Increased Nitrogen Manuring for Avoiding Oidium SLF	120
Planting Materials used in Peninsular Malaysia for 1973 and 1974	125
Notes, News and Views	131

Planters' Bulletin 147

Editorial: Mechanised Material Transport for NR Processing	133
Use of Mechnical Aids for Transport of Materials in SMR Factories	135
Bark Necrosis	146
Branch Induction of Young Trees	149
Notes, News and Views	159
Index 1976	160
